EDUCATION

Irvine Valley College
GPA: 3.86

May 2025

University of California, Irvine
Major: Computer Science

June 2027

SKILLS

Programming Languages: C/C++, Java, HTML, CSS, Javascript, Python

Spoken Languages: English (Fluent), Mandarin (Conversational)

EXPERIENCE

Private Math Tutor | Irvine, California

February 2025 - Present

- House calls for math tutoring ranging from middle school pre-calculus to linear algebra.
- Helped students with explaining textbook material, practice problems, and homework help.

Physics Tutor | Irvine Valley College

February 2025 - August 2025

- Attended lecture for undergrad physics and held office hours outside to help with material.
- Also offered help for math, computer science, and other physics courses besides the embedded class.

PROJECTS

Muon Project

January 2025 - October 2025

- Soldered a Muon Detector based on the MIT Cosmic Watch Project.
- Specialized in tech support and writing for the group. Wrote all drafts of the abstract that got us accepted into Bay Honors and was part of the trip that flew up to present the findings of the project.

Productivity Extension

August 2024 - Present

- Used Chrome Developer tools to create a Chrome extension that tracks the tabs that are currently open on the users window.
- Self taught basics of DOM manipulation and extension development.

AWARDS AND ACHIEVEMENTS

Bay Honors Research Consortium | Researcher, Presenter

April 2025

Honorable Mention for Heslet Scholar Award (Top 5 Symposium Projects)

- Presented a Muon Detector and the process of building one in UC Berkeley.
- Was invited to publish a paper in October 2025 with the Consortium on the basis of the Honorable Mention for the Heslet Scholar.

RAMP HTTC Conference | C++, Python | Researcher

April 2025

- Accepted into NCUR and HTTC and presented findings at UC Riverside.
- Analyzed the differences in runtime of C++ versus Python with solving numerical integration problems.
